MEMORANDUM FOR: Recipients of CIA Intelligence
Report, Increased Complexity in
Soviet Land Arms, SR IR 75-15,
September 1975 (SECRET NO
FOREIGN DISSEM)

FROM : Office of Strategic Research

SUBJECT : Errata to SR IR 75-15

1. Minor errors in presentation have been discovered in the subject report. The errors in no way change any of the judgments regarding the impact of new weapons costs or other conclusions reached in the report.

2. The changes necessary to correct the report are detailed below and cover two areas. First, a number of changes in footnotes to tables and one chart are necessary to indicate production projections are made through 1985 and not 1981. In Table 5 a change is not required since it is estimated that production for the BMD will run only through 1981. Secondly, changes in the number of units produced and total program costs for the BMP and BTR-60PB are necessary to include production projected through 1985.

3. Please make the following changes in your copy:

Page 7, Figure 1. Change the note to read
"...are projected only through 1985."

Page 15, Table 3.

Change the number of units produced
for the BMP to read 27,050 and for the
BTR-60PB to read 18,300.
